

INTERROGATION

"In observing Nazi sterilization policies, the Journal of the American Medical Association did not so much express outrage as it contrasted America's 'more gradual evolution of practice and principles regarding sterilization.' Ardent American sterilizers...could even complain: 'The Germans are beating us at our own game.'"

- Robert Jay Lifton

The Nazi Doctors (page 24, 1986)

"Most of the subjects of the Tuskegee syphilis experiment [a government-initiated program to study the effects of untreated syphilis on black men, which ran from the 1920's through 1972] trusted the government doctors. With Nurse Rivers [a black woman counselor] acting like an old friend, they never considered the fact that they were in danger...Her close personal relationships with the subjects were a key in helping the Public Health Service...sustain the mirage that patients were being cared for, that the government was doing more than just waiting for them to die."

- Charles L. Ortleb

Editorial, New York Native (July 1985)

The AIDS medical establishment is led by career opportunists who zealously adhere to a political agenda fostered by the Reagan Administration to "win the race" against French researchers in finding the cause of AIDS. Any cause. After twelve years, no cause has been definitely established - HIV is merely a theory, and one that does not stand up to logical scrutiny - plus we have not even satisfactorily defined what AIDS is.

The only medications officially approved for treatment are the anti-HIV drugs AZT and DDI, drugs that are toxic, carcinogenic, and very profitable. Originally intended for use only in the final stages of illness, these poisons are now routinely given to healthy people with HIV antibodies, including pregnant women. They cure nothing, and when given to a healthy person with HIV antibodies, they almost certainly hasten death.

This "rogues gallery" presents a clique of some government scientists and their supporters who adhere to the federal government's political agenda by stating that the United States is doing everything to combat this epidemic, and putting all of its unproven theories into one large "multi-million-dollar basket." Even the original discoverer of HIV, Dr. Luc Montagnier of the Pasteur Institute in Paris, has since rejected his own claims, that the HIV virus is the sole cause of AIDS.

Yet these collaborators maintain their positions of authority through theft, questionable research, conflict of interest, fabricated data, bogus medications, lucrative publishing deals, and star-studded fundraising scams. Along with their "AIDS Movement" flunkies and media cheerleaders, they have conspired to stifle any research that does not center on the HIV theory. Credible scientists attempting to investigate alternatives to the HIV theory, as well as promising - but often inexpensive and therefore unprofitable - medications and treatments, have been ridiculed, losing funding and even their jobs.

The things that you have been told about AIDS - that it is caused by HIV, that American science is not politically motivated, that competent and compassionate researchers and health care providers are in charge - are all lies!

HIV and the remedies for it have been a red herring to divert attention from the failure of the medical establishment to make any meaningful progress in AIDS research, to contain the epidemic, or to find a cure. To paraphrase Gravity's Rainbow by Thomas Pynchon: If they can get you to ask the wrong questions, they don't have to worry about the answers.

- Bruce Eves, 1993
