

A r t o f S p a c e

- installation proposal cont.,

The installation proposed for the 16'x16'x11' space is to represent simultaneously the interior spaces and exterior objects inspired by the scenario of the bridge dweller.

The enclosed photographs begin to speak of the nature of the materials to be used which will consist of so-called 'found materials' as described in the story and will include wood, metal, barbwire, rope and cardboard as well as newspaper to collage the enclosure of the space and various surfaces of the pieces.
